

**POWER DOOR CONTROL AND SENSOR MODULE  
FOR A WIRELESS SYSTEM**

**Abstract of the Disclosure**

5           A module with a sensor to indicate the position of a door coupled to a door  
opener. The module is compatible with a wireless communication protocol and  
operates over both a long range, such as is used with a cellular telephone, and a short  
range, such as is used with BLUETOOTH®. A door position sensor coupled to the  
module provides information to the user over a wireless communication channel. In one  
10   embodiment, information from an additional door position sensor is wirelessly  
transmitted. In one embodiment, an audio transducer coupled to the module responds to  
voice commands to operate the door opener.
